virtuemart products and 2 langs

Posted by polpaulin - 2011/01/14 06:47

I am using 2 domains names one .fr in French one .com in English , the 2 websites are different, but I want to be able when I add new products in Virtuemart to see them in the 2 websites, customers and orders have to be different, actually I am using one database with josfr_ and josen_ tables and triggers

is it possible to do it with your component ?

and I want to have the 2 websites in 2 languages without using joomfish at all

thank you
