Upgrading to Joomla 1.6 Posted by RandyF - 2011/01/27 18:53

I'd like to upgrade to Joomla 1.6. Is JMS fully compatible with 1.6, and are there any things I need to know before I begin?

I plan on using jUpgrade: http://extensions.joomla.org/extensions/migration-a-conversion/joomla-migration/11658 Are there any problems using this method?

Re: Upgrading to Joomla 1.6 Posted by edwin2win - 2011/01/27 19:12

As you can read in our change history, JMS multisites is still partially compatible with Joomla 1.6 http://www.jms2win.com/en/faq/change-history-v12x

Concerning the Upgrade extension, it is not defined in the JMS Tools and you may perhaps need to re-install in the slave site to convert the slave site. I can not guarantee you that this extension will work for the slaves. I will try to test it.
