Multiple Site but shared Content

Posted by Melina - 2011/03/30 10:35

Hi

I am interested in purchasing MultiSite but have one question : I have two domains, .co.za and .com both hosted on the same server.

Each has got a different template but 8/10 articles are the same. Can MultiSite share those articles or do I have to purchase the "Article Sharing" in addition?

Many thanks

To share the 8/10 article, this is possible with the "Article Sharing for JMS" that require Jms Multi Sites. This solution only works for Joomla 1.5.
We didn't yet finished the development of the "Article Sharing for JMS" compatible with Joomla 1.6
