## JMS, multisite for joomla - Joomla Multiple Sites and user sharing

Generated: 16 December, 2025, 12:35

Error f Posted by	or ma	king	new	sites
Posted by	buddyq -	2011/07	/13 22:	51

I had to restore the database from July 6th and I went to phpMyAdmin and exported the database of sites I had made AFTER July 6th so that I could IMPORT them using phpMyAdmin afterwards. Files were not touched, just the database.

However, now when trying to make a new site, I get this error:

Create table error on guery. DB Error: Incorrect key file for table 'jos k2 items'; try to repair it SQL=CREATE TABLE IF NOT EXISTS 3901islandknoll k2 items LIKE `gottesma joomla`.`jos k2 items`

could you please tell me what this means?

## Re: Error for making new sites Posted by edwin2win - 2011/07/14 18:24

This simply means that a MySQL table is not restored. In other words, this probably mean that your backup didn't backup everything or that changes appears after the backup.
