error 500

Posted by heatle - 2011/09/16 18:59

The extension did not work I get error 500 when I click on configure
See if you can tell me something
a greeting

500 - Se ha Producido sin error

JDatabase::getInstance: Could not connect to database
joomla.library:1050 - Table 'jos_jarpx_mapid' already exists SQL=CREATE TABLE `jos_jarpx_mapid` (`user_id` INT NOT NULL ,`rpxid` VARCHAR(50) NOT NULL);

==========

Re: error 500

Can you describe more in detail what you mean by "when I click on configure" ?
Can you give screenshot and give a detail scenario ?

Which is the slave sites definitions ?
