Hi!

Hopefully Jms2win will be the solutions for my needs. Before ordering this I would like to know we things.

1. Will this work with Virtuemart 2?

2. If my master site is made by Joomla 1.5.23
 - Can I have slave site that is made by Joomla 1.7?

Thanks

---

1) I don't know yet - Didn't have tested the VirtueMart Version 2 yet.

2) NO.
The concept of JMS is to share the same Joomla installation (PHP Code).
So all the website are using the same joomla and therefore the same version.

Not fast.
This is in our to do list for several weeks.
