Hi!

Hopefully Jms2win will be the solutions for my needs. Before ordering this I would like to know we things.

1. Will this work with Virtuemart 2?
2. If my master site is made by Joomla 1.5.23  
- Can I have slave site that is made by Joomla 1.7?

Thanks

- 1) I don't know yet - Didn't have tested the VirtueMart Version 2 yet.
  - 2) NO.  
The concept of JMS is to share the same Joomla installation (PHP Code).  
So all the website are using the same joomla and therefore the same version.
