Unable to install

Posted by iganor - 2011/11/02 18:29

Hello,

I just downloaded the zip file and when I clicked on the Extension Manager Upload Package Option I get the following error:

"There was an error uploading this file to the server."

Any help!

See tutorial video 3
http://www.jms2win.com/en/tutorial#jms12x-3

and probably the installation from a directory when you server has limitation to upload large file (4MB)
http://tutorial.jms2win.com/joomla/multisite-12x/cpanel/install-from-directory
In case of Joomla 1.6 or 1.7, you have to use the subdirectory _j16 to get the manifest file for the joomla 1.6 or 1.7
