Updating to latest version of JMS

Posted by trumpet - 2012/02/25 03:49

Hi Edwin, I can find no step by step tutorials on how to update to the latest version. Your article "How to update and get the latest version of JMS" does not seem to have enough info. Do I do it through Cpanel, or through Joomla. Please give me the idiots guide. Thanks Wayne

I don't know what I can do more.
You have video and also a PDF that explain thing step by step.

You must use your account where you buy the product.
Otherwise, your product list is empty and you can not get its latest version.

FAQ = http://www.jms2win.com/en/faq/faq-joomla-multi-sites#cat-122
Video = http://tutorial.jms2win.com/joomla/multisite-12x/getlatestversion/index.html
PDF = http://www.jms2win.com/en/documentation/doc_download/20-how-to-get-the-latest-version

When you have got the ZIP with the latest version, go in your master website and use the Joomla extension manager to install the package over the current one.
