How to create a new DB? Posted by lautes - 2012/03/27 11:23
Hello!
How to create a new DB for a slave site? I enter: DB host: localhost DB name: city DB prefix: city_ DB user: root DB password: (password is empty)
I click to "Save" and see an error: Database Error: Unable to connect to the database:Could not connect to database.
I open a file multisites.cfg.php and enter: define('MULTISITES_DB_GRANT_HOST', 'localhost'); define('MULTISITES_DB_ROOT_USER', 'root'); define('MULTISITES_DB_ROOT_PSW', ");
Where is an error? Or I have misunderstood also a database it is necessary to create independently through phpMyAdmin.

As the PSW is empty, if you have entered a PSW somewhere else, it will probably use the password your DB to copy or new DB to copy.
I suggest that you create a specific "root" user with a password.
