Old sites

Posted by power2nc - 2009/10/16 22:24

I have been cloning Joomla sites, can I add SYNC to them know with JMS or do you have to SYNC them from the get go?

thanks

We have never tested SYNC.
So if you want to know if SYNC is working with JMS, send us this extension in attachement of an email.
See contact us for the email http://www.jms2win.com/contact

Why do you need SYNC in addition to JMS.

JMS contain a user sharing facility.
You also have the possibility to share some extensions and you also have the "article sharing for jms" that allow display the articles coming from any websites define in JMS.
