Using JMS running on localhost

Posted by el patron - 2010/02/10 15:01

For testing speed etc...we like testing on our localhost.

Is it possible to run JMS with with master/slave sites defined in a localhost environment?

thanks as always for the community help!

See chapter 9 in user manual.
The procedure is explained.

Cool..thank you so very very much...just getting into the extensive manual, which is one of the most detailed I've ever seen for a joomla attachment. Really more documentation that the core itself..:)
