www.domain.com redirect 301 to domain.com

Posted by iqingenieros - 2010/03/15 14:09

Hi:

How can I make this?:

master.com (master site)
slave.com (master replic)

www.slave.com -> redir 301 to -> slave.com

Thanks

I found the solution, It is only necessary to put this code:

RewriteCond %{HTTP_HOST}//s%{HTTPS} ^www.(.*)//((s)on|s.*)$
RewriteRule ^ http%3://%1%{REQUEST_URI}

in the main .htaccess file just after "RewriteEngine On"

ATENTION: the redirection will be done for all domains

NO.

You just have to defined in JMS that both www.slave.com and slave.com are synonym in the list of domains.

Site ID = xxxx
list of domain = www.XXXX.com
XXXX.com

==========
