Deleting a Site

Posted by DaveC - 2010/06/06 01:49

Hello

Is it possible to delete a site with code?

Thanks
Dave

You can delete a site and its deployed directory.
In this case, this will delete everything.
So if you have put speicifc directories in the "deploy folder" they will be also removed.

Becaurefull if you have setup a slave site that has a location in a upper directory than your master.
This will delete everthing including your master.
