Can not login to my slave sites admin with www

Posted by kseones - 2010/06/13 14:08

I have created with Tutorial "How to share the users and extensions betweens websites" 2 slave sites. There is no problem with the parent site. I can not login to child sites admin under www.domain.com (no warnings), but under domain.com can i login, i have controlled the title and i have both of domain names in "List of domain names" written.

Thank you, regards

There is no problem anymore, i think that was a cache problem.
Great extension, Thanks.
