Expiration date:

Posted by DaveC - 2010/07/13 15:04

Hello

I do have quota...

I have the Expiration URL: set to a known good URL. When I set the Expiration date: to the date earlier then today the site goes offline but instead of the redirection page it goes back to the home page instead of the Expiration url as set.

Would you have any tips for troubleshooting this issue?

Thanks
Dave
