JMS Error Message
Posted by ryscript - 2010/08/23 10:56

Hi Edwin

"SITE_DEPLOY_ALIAS_CREATION_ERROR2"

I got the error message above every time I tried to create JMS. what should this error mean?, why should this happen?
what should I do related to this error?..

your reply is greatly appreciated.

thanks
Ryan

I which language did you install JMS ?
Normally, the english error message related to this error code mean that the alias already exists.

This may happen when you try create a website with an alias and that this alias can not be create.

---

thanks for the quick reply

this error happened when I install the latest version of JMS. I also tried creating a JMS site with out alias and same error occurred.

Ryan

Perhaps you had an older version where the control of the alias was not present.
The alias is checked starting with version 1.2.33.

See change history
