Noobie Question - is this configuration possible?

Posted by jadrake - 2011/01/14 13:28

Hi guys,

I have one site that I want to display 2 different site banners at the top of, depending on which URL is visited. All the content of the 2 sites is exactly the same.

eg:
URL 1: www.abc.com
URL 2: www.def.com

Entering www.abc.com should give you the site, with the ABC banner at the top of the site. All the content stays the same.

Entering www.def.com shoudl give you the same site, but with the DEF banner at the top. All the content is the same as the other site.

Can I do this using multisites? (I already own a licence!). If so, care to tell me how? Please be gentle - I'm a newbie to multisites (but pretty knowledgeable in Joomla).

I'm using J1.5.22

Thanks,
Adam
