Presentation front-end
Posted by matonsan - 2011/04/22 13:01

Hello,

I've got a basic template site that I would like to replicate from your component published on the front-end.

The process is working but I would like to remove the strange 'JTOOLBAR_ICON' icon.

I'm also interested in advanced parametrisation of the interface in multilanguage on joomla 1.6, is there somewhere a reference for that.

Thanks in advance for your help!!

David

I suppose that you have this error message with a Joomla 1.6 in french.
I also suppose that the JTOOLBAR is not the ICON but in fact the following values that should be defined in the language file.

JTOOLBAR_CANCEL="Annuler"
JTOOLBAR_EDIT="Edition"
JTOOLBAR_NEW="Nouveau"

I have added the upper definition in the /language/fr-FR/fr-FR.com_multisites.ini file.

The fix will be available in the next release of Jms Multi Sites (1.2.51).

It works !!
Thanks.
