# help. template and slave site creation....

Posted by tartarusspawn - 2011/06/26 05:59

---

just can seem to figure it out is the a

multi sites for dummies guide somewhere. im lost...

i want users for main and slaves to be the same....

slave sites to use template for design....

To share the users between 2 sites, see the video 16 that show how to proceed to share the users between slave 1 and slave 1A
http://www.jms2win.com/en/tutorial#jms12x-16

I don't know what you mean by "template for design"
If you want to create website with specific "/templates" directory, see the video CP-05
http://www.jms2win.com/en/tutorial#jms12x-CP-05

For the "dummies", you have plenty of videos that you can use to help you reproduce the cases and teach you on how to do different "common" things.
So I suggest that you have a look in our tutorial videos.
