Moving to 1.7, where to get latest vesion of JMS M

Posted by bo@e10.se - 2011/10/03 14:02

Hi,
I tested Multisites about 10 months ago and did not have time to
finish the testing, mainly due to that my webhotel did not allow
symbolic links.

I have now moved to another supplier and will give Multisites a try again.

Where can I get the latest updates for 1.7 ?

BR
Bosse

To get the latest JMS version 1.2.66 that is joomla 1.7 compatible, see the FAQ for the procedure to get the latest version
http://www.jms2win.com/en/faq/faq-joomla-multi-sites#cat-122
