Arrowchat 404's after installing patch

Posted by mattesar - 2012/06/13 06:22

Hi,

I have installed JMS in my site, and installed the patch. Then, when I tried to log into the Arrowchat admin (mysite/arrowchat/admin), I got 404 error. It automatically redirects to /arrowchat/admin/installation/index.php, which does not exist. I uninstalled the patches, and the admin panel works as usual.

So, I'm thinking that one of the patches thinks that the arrowchat/admin folder (or any non-Joomla folder in the root folder, I suspect) is somehow a not-yet-installed Joomla site.. Can I maybe exclude the arrowchat folder or something?

Thanks.

What is "arrowchat" ?
Is this an extension or an extension application ?

I don't know this "arrowchat" extension and never reviewed it.
If you want that we add the definition of this extension in JMS, you can send us the extension in the attachement of an email.

See contact us for the email address
