Jomsocial URL trouble

Posted by bbr170 - 2012/10/10 01:23

Hi I have Jomsocial on my site and when I create a slave site it adds the the date plus some other numbers to the URL only on the photos and videos pages of the slave site. This is what the URL looks like on the slave site:
http://demo2.newenglandtrailsource.com/2012-10-08-20-21-09/all-photos/album.html?albumid=74&groupid=9
http://demo2.newenglandtrailsource.com/2012-10-08-20-21-09/all-videos.html

I have highlighted the trouble.

Thanks

JMS does not add or perform any action on the page generated.
If you have a date that is added, inside the page content, verify that you don't use a plugin that would process for example a search/replace or a SEF processing that would change the URL present in the page.
