corephp

Posted by power2nc - 2009/10/15 11:11

Has anyone used or tried to used phpCore? they have a multisite function.... would that work with the Master site of jms?

Is there any ACL that works besides noxiACL?

Would you please send us the phpCore in attachement of an email.
See contact us for the email
http://www.jms2win.com/contact

We don't know if you are refering to corephp (not phpcore) that distribute the WordPress MU (com_wpmu) that is defined in JMS and for which we also providing the sharing functinoality.
See extension http://www.jms2win.com/component/content/article/135
