Tag Meta

Posted by king.lui - 2009/11/27 15:32

Hi.

I need the component Tag Meta:
http://extensions.joomla.org/extensions/site-management/seo-a-metadata/7124

Is it compatible with JMS?

Thanks and cheers

Yes this extension is comptaible with JMS.
It is not yet defined for the JMS tools but you can re-install it into the slave site without any problems.
We will adds its definition in a next release of the JMS patches definition to avoid re-installing it into a slave site and benefit of a central control.
