GreenMountain LFMR (Logos Form and Report Manager)

Posted by intmarine - 2010/02/17 00:08

Bonjour

I notice in an earlier thread, that you had to include its definition in a release of Multisite.
http://www.jms2win.com/forum/25-extensions-compatibility/2848-jseblod-cck

I am using a program similar, GreenMountain LFMR (Logos Form and Report Manager). It is also not on the list at:
http://www.jms2win.com/component/content/article/135

Will something need to be done to make it facile to use it with Multisites?

I thank you. I am buying Multisite now and hope for the best.

Concerning jseblock, it is include for JMS patch definitin version 1.2.22
See http://www.jms2win.com/faq/patches-definition-v12x

Concerning the LFMR, send us this extension in attachement of an email and we will review it. If possible, we will include its definition in a next release.
