Frontend User Article List

Posted by VDmitry - 2010/02/22 19:47

Hello Edwin!

What about compatibility with Frontend User Article List component. I can not use it in slave site. Is there any idea?

Br, Dmitry.

What do you mean by Front-end "Article List component" ?
Do you mean the standard joomla "com_content" component and its menu item "article" -> Category list ????

Perhaps you could give a screenshot that would help identify which is the "front-end article list compoment'.
If this is an addition extension, please send us this extension in attachement of an email for review.

Hello Edwin!

Thanks for your reply. I have resolved the FUAL problem.

Br, Dmitry.
