

## Problems with AceSef

Posted by KingoftheRoad - 2010/03/12 08:08

---

Hi Edwin,

I experience some problems with AceSef

1) The joomla/administrator/components/com\_acesef/configuration.php seems to be shared by slaves & master.

All my configuration at slave site seems not effective.

2) I cannot see the screens of URLs in AceSEF.

Original AceSef Screen :

[http://www.jms2win.com/images/fbfiles/images/AceSef\\_Original\\_800.jpg](http://www.jms2win.com/images/fbfiles/images/AceSef_Original_800.jpg)

JMS AceSef Screen:

[http://www.jms2win.com/images/fbfiles/images/acesef\\_800.jpg](http://www.jms2win.com/images/fbfiles/images/acesef_800.jpg)

Pls advise.

Many thanks.

Seth

Check that you have installed the JMS patches.

There is one for AceSEF configuration.php file present in their directory.
