JMS article sharing and Flexicontent sharing.

Posted by KingoftheRoad - 2010/03/24 15:38

Hi Edwin,

You have explained to me that Flexicontent is too complicated to be shared among slaves.

However, I know Flexicontent is actually using Joomla's Com_content's tables to store the article items.

Could we achieve some level of Flexicontent article item sharing via your JMS article sharing?

If we also share COM_USER, can we do more towards true sharing Flexicontent in JMS.

Many thanks.

Seth

The only solution that I see is to create a "Multisites Flexicontent" and this is not my objective.
