Is Zoo supported or not?

Posted by king.lui - 2010/04/03 16:13

Hi.

In your complete list I can see that zoo is supported, but I can see also this: "Zoo from YooThemes that can not be re-installed due to specific installation procedure used by this extension." What does it mean. Can I now use Zoo for my slaves or not. *confused*

Thx and cheers..
