Kiss Advertise System

Posted by Zappu - 2010/04/13 10:41

Will it be possible to change this component to a full multisite component with shared information between the differen sites?

http://www.kiss-software.de/index.php?option=com_jdownloads&Itemid=27&task=viewcategory&catid=2&lang=en

The Kiss Advertise System is probably one of the most used classified systems now and it would be great to have it fully integrated into the multisite system, so people can make an advertisement which will be published through all of the multisites.
