Joomla 1.5.17
Posted by KingoftheRoad - 2010/04/30 05:34

Hi Edwin,

What is correct sequence to upgrade to Joomla 1.5.17?

I have upgraded to JMS1.2.28, then applied the patch of Jooml1.5.15 to 1.5.17, then it comes out the installation page at every slave site.

Many thanks.

Seth

Problems solved. Just to install the patch again.

Exact.

As you have mentioned:
- Start to install the JMS update 1.2.28
- Install the Joomla 1.5.17
- Reapply the JMS patches. You will see that plenty of files have been replaced by joomla (almost all).
