SH404SEF causing site to run 70% slower

Posted by jguthrie - 2010/06/10 22:56

_____

Hi,

I am wanting to get feedback from others using SH404SEF with JMS.

Previous to implementing JMS I was successfully using SH404SEF and did not experience any noticable performance issues.

Since having implemented JMS my site is almost unusable due to page load performance. After some troubleshooting I narrowed it down to SH404SEF. Disabling SH404SEF and my site is lightning fast again.

My configuration:
Joomla 1.5.14
Virtuemart 1.1.4
JMS Version 1.2.28 (Latest available: 1.2.31)
Patches definition Version 1.2.34
SH404SEF 1.5.12.464

2 Sites merged using JMS. 5000 products in the 1 and 400 in the other.

Enabling SH404SEF Cache or not does not make a difference.

Anyone with a similar experience and have a solution?
