JMS 1.2.32 extensions

Posted by ryscript - 2010/06/24 04:43

Hi edwin;

I really need your opinion

Is this new JMS 1.2.32 version and its patches are compatible with Joomla 1.5.18..?
because I have a problem in slave site configuration before in JMS 1.2.31, when I am going to put a SEF to YES.

and is this not giving an error configuration, because I directly upgrade my JMS version from 1.2.28 to 1.2.31..

thanks

All verion from 1.2.28 are compatible with Joomla 1.5.18 as all the Joomla fixes does not concern any JMS patches.
