iJoomla Ad Agency

Posted by mihha - 2010/11/18 08:52

Hi,

I see that you included iJoomla Ad Agency in the configuration but only as install possibility.

Do you plan to extend this support so multi sites could share data between sites?

==========

No it is not possible to share this extension.
In addition it uses IonCube and we are not able to perform any review of the code to discover the data model analyze all the DB queries.
