SIGE - Simple Image Gallery Extended

Posted by kono - 2010/11/28 16:09

Bonjour,
it will be fine to assure compatibility with this very simple plug-in.
download link:
http://joomla-extensions.kubik-rubik.de/en/downloads/sige-simple-image-gallery-extended-download

Thanks for your work
Cordialement.
kono

YES you can use SIGE in the master and slave site.
This plugin does not require any MySQL table and you can just define it.
We will add its definition in a next release of JMS Multisites patches definition to show that we have reviewed it.
