JomSocial not displayed on Share DB tree

Posted by markaharper - 2011/04/08 22:13

Hello,

Excellent product! Thanks!

Website template Details / Sharing

When setting up a "template rule" for sharing users (both template site or duplicate existing site), the JomSocial db/tables do not appear within the DB Sharing tree. (see attachment)

Joomla users display on the DB Sharing tree, but not JomSocial even though the tables are within the master database.

Am I missing something?
Is this a Joomla 1.6.1 or JomSocial 2.2 issue?

Thanks Mark

JomSocial 2.2
Joomla 1.6.1

If it does not apprear in the list, this is perhaps because JomSocial changed the name of the extension.
You mentioned a JomSocial 2.2 version.
The latest check that I did was a 2.0.4.
So please send me the JomSocial 2.2 version into the attachement of an email to let me recheck with this version.
