List of compatiblie extensions Posted by Batch1211 - 2011/04/24 18:51
Hey,
is there a list of all extensions that JMS tools has install definitions for? I'm looking for an image galery and I would love to have a list to see, if the chosen galery is supported. I know that I could just install i and see, but a list would safe some work.
Best wishes, Alex
