BF Quiz for Joomla 1.7

Posted by markredmond9 - 2011/09/27 03:15

I installed BF Quiz for Joomla 1.7 on the master site. I then used the tools to install BF quiz on the slave site. I also installed this extension directly on the slave site. Under the tool tab it is not showing the tables installed on the slave site (see attached image). I also get the following error on the slave site when I try and used the BF Quiz component:

Table 'master_investmentengineerJ17.a7ar5_bfquiz_plus' doesn't exist SQL=SELECT ag.title AS access_level,a.*, cc.title AS category_name FROM `a7ar5_bfquiz_plus` AS a LEFT JOIN a7ar5_viewlevels AS ag ON ag.id = a.access LEFT JOIN `a7ar5_categories` AS cc ON cc.id = a.catid WHERE (a.state IN (0, 1)) ORDER BY a.parent,category_name asc, a.ordering asc Table 'master_investmentengineerJ17.a7ar5_bfquiz_plus' doesn't exist SQL=SELECT ag.title AS access_level,a.*, cc.title AS category_name FROM `a7ar5_bfquiz_plus` AS a LEFT JOIN a7ar5_viewlevels AS ag ON ag.id = a.access LEFT JOIN `a7ar5_categories` AS cc ON cc.id = a.catid WHERE (a.state IN (0, 1)) ORDER BY a.parent,category_name asc, a.ordering asc LIMIT 0, 20 Table 'master_investmentengineerJ17.a7ar5_bfquiz_plus' doesn't exist SQL=SELECT ag.title AS access_level,a.*, cc.title AS category_name FROM `a7ar5_bfquiz_plus` AS a LEFT JOIN a7ar5_viewlevels AS ag ON ag.id = a.access LEFT JOIN `a7ar5_categories` AS cc ON cc.id = a.catid WHERE (a.state IN (0, 1)) ORDER BY a.parent,category_name asc, a.ordering asc Table 'master_investmentengineerJ17.a7ar5_bfquiz_plus' doesn't exist SQL=SELECT ag.title AS access_level,a.*, cc.title AS category_name FROM `a7ar5_bfquiz_plus` AS a LEFT JOIN a7ar5_viewlevels AS ag ON ag.id = a.access LEFT JOIN `a7ar5_categories` AS cc ON cc.id = a.catid WHERE (a.state IN (0, 1)) ORDER BY a.parent,category_name asc, a.ordering asc

What is happening Edwin? I am also sending you this extension in an email so you can test it if necessary.
Thanks,
Mark Redmond http://www.jms2win.com/images/fbfiles/images/Capture-20110927.JPG

When an extension is not defined in the JMS tool, generally you have a red cross X that tell you that there is a risk to define the extension because we never reviewed the extension and discovered which MySQL tables are used by the extension.

In this case, you have to send a the extension in the attachement of an email.
We received it and we will have review it to potentially include it definition in a next release of Jms Multi Sites;
