_____

It seems that the sharing into fresh slave site of this simple module works
(I did a quick look in the db tables too)

Since it does not exist in the compatibility extension list
I just want to know if it may be inserted in that list or
I should looks for others better solutions as
a) directly embedding facebook pages or
b) another extension

thx

I don't really understand your question.

If you want that we add a new extension in the list of extension, please send us the extension in the attachement of an email.
We will review the extension and in case where it can be added, we will do it.
See the "contact us" for the email.
