# arra user export import

Posted by ashdodia - 2011/11/23 08:11

---

Hi,

I am in the process of migrating all my joomla sites to joomla 1.7 + JMS. My only open issue is the lack of user import tool that works with JMS. It there any other way to import users into slave sites other than using a tool like arra user export import ?

Are there any plans to support arra user import / export ?

Thanks,
Saar.

For the moment, we are waiting to see what Joomla will provide in Joomla 1.8 (or 2.5) to perform the migration from joomla 1.5 to 1.8.
When it will be released, we will analyze it and will see what we can propose to help our customers.
