When I create a new article in the Master DB it does not show up when I try to create a new menu item from a slave site. How do you get the artcile list to refresh? I have tried clearing the cache from Joomla, and hit the purge converted files in Multisites article sharing.

Re: Article Sharing does not refresh doc list Posted by edwin2win - 2012/08/01 22:06

I don't know why it is not refresh.

My first idea is the same as yours.

Cleanup the joomla cache and browser cache.
