hello

i have subsites in directories of a same domain how can i configure the plugin plgSystemMultisites_SSIDomains to enable a functionality single sign ..

Re: Single signin for subsites in same domain Posted by edwin2win - 2012/11/13 21:36

You don't need this plugin to share the session between the websites.

You simply have to share the users between the websites.

This is a functionality present in JMS.

You can share the users between the websites and also remain logged when you are using subdomains or subdirectories of a same domain (that is your description).

See the tutorial video 16 on how to share the users.
