Partial User Sharing plugins trouble

Posted by canadareic - 2013/02/07 07:05

---

we are implementing partial user sharing and unfortunately getting problem with one plugin

Partial User Sharing please see attached.

what would cause such situation?

thank you very much

This looks like a PHP Fatal error that stop the script rendering.
Verify your "error_log" file to get more info.

Verify also the version of the the extensions (Partial User Sharing and JMS) to ensure that you have the latest version.
