# Error on resaving site from manage sites

Posted by dinaras - 2020/03/06 14:47

---

Hello,
When i edit a site from manage sites menu i am not able to save back, i get many errors. From the rrors i see that prefix is missing although i can see it appear correctly when site is edited.

Also if i press refresh jms links from maintenance, site stops working and all symbolic links are gone

Why is this happening?
Any ideas?
Thank you

Regards
Konstantinos
