Fatal error: Allowed memory size

Posted by oferme - 2009/09/24 16:08

Hi,
When i tried to install multisite, i get the error:

Fatal error: Allowed memory size of 18874368 bytes exhausted (tried to allocate 1796805 bytes) in /hermes/bosweb/web274/b2742/ipw.ofermall/public_html/newsroom_il/libraries/joomla/filesystem/archive/zip.php on line 325

any idea how can i solve this ?

thanks in advance
ofer

Probably you have a limit in the size of file that can be unzipped or a timeout during the upload of the package.

One solution is to unzip the JMS extension in a temporary directory and after use the Joomla / Install from a directory to avoid the potential timeout of memory limit.

---

thanks for the advise,
i was unzip the JMS extension and install it from temp directory.

after that, all went good.

:)
