many NOT OK to the check patches installation

Posted by dynamicsite - 2009/10/29 00:57

Hello

I get OK only for the following
administrator/components/com_multisites/install.xml
includes/defines_multisites.php
includes/multisites.php
libraries/joomla/filesystem/folder.php

also it seems to try find files under installation/ but this was deleted after the installation process of the master....

i may not understand something but it seems that multisites does not work for me?

i run joomla 1.5.14 and
Joomla Multi Sites version: 1.2.11 (Latest available: 1.2.11)
Patches definition version: 1.2.14 (Latest available: 1.2.14)

pls advice
Yours

You have to install the patches and if not all the patches are installed, this is probably due to a permission issue.
See the tutorial video 3 that show how to install JMS
http://www.jms2win.com/tutorial#jms12x-3
