New site missing fields

Posted by deneuvier - 2010/02/12 12:46

Hi,

when i want to create a new site, some fields are missing ?!

http://www.sorecson.fr/bug.PNG

i m on apache 2 Plesk 9 PHP 5.2

what s the problem ?

thanks

JMS only try to only display the fields required depending on the context.
So it is absolutelly normal that you don't see all fiellds.

For example in the screenshot that you provided, there is no files relatives to the "JMS templates" as you have not yet create none of them.
So all the fields are skipped.
This could be also the case if you would had the "Symbolic Link" functionalities available (that is not this case).

So in this screen, which field you think is missing and that you would like to see and that for you is a bug ?

At the begining, Symboliclink was not allowed so i chmod 777 :

/httpdocs/administrator/components/com_multisites/multisites.cfg.php
/httpdocs/tmp
/httpdocs/logs

Symboliclink are now allowed

http://sorecson.fr/bug2.PNG

but some fields are still missing when i want to add a new site ?

Thanks for your answer http://www.jms2win.com/images/fbfiles/images/bug2.PNG

_____

Which fields are missing ?
Enumerate them and give new screenshot.
