Db error on creation of slave site

Posted by miami - 2010/04/26 04:39

All's working well with our slave sites, and I wanted to create a new slave, with the same Website Template, but with a different DB prefix, in this case, indl_.

Error I am getting back is:

Error(1) query . DB Error: CREATE VIEW command denied to user 'induguia_jo151'@'localhost' for table 'indl_users' SQL=CREATE OR REPLACE VIEW indl_users AS SELECT * FROM `induguia_jo151`.`master_users`... etc.

Why?

You will find plenty answers in this forum. Always the same reason for "command denied"
http://www.jms2win.com/forum/search?q=command+denied+to+user

You have to increase the privileges of your MySQL user to add "create and show view".
Also explained in the tutorial video CP-02 and in 0.b - slide 35
http://www.jms2win.com/tutorial#jms12x-0b
http://www.jms2win.com/tutorial#jms12x-CP-02

Yup, that's it "create views, show views" on Cpanel.

---

cPanel does NOT provide this facility.
If you are using a shared hosting, you have to contact the support to grant your user.
If you have a dedicated server of have the "root" PHPMyAdmin, you can do it yourself.
