Problem with the JMS installation and SH404sef

Posted by Dewx - 2010/07/29 16:19

I welcome, for me such a problem appeared, at choosing the Check administrator in the panel patches and Install it appears for me notification:

Error during installation of the file "administrator/components/com_sh404sef/sh404sef.class.php"

and still at the bottom:

One or more backup file is missing. The original file(s) can not be restored.

Installed I have JMS 1.2.8 and SH404sef in the version 2.0.1.531.
and in the table it is on the position the last but one and it is written:

administrator/components/com_sh404sef/sh404sef.class.php Not OK
The Multi Sites specific "config.sef" saving for each websites is not present.
Actions:
Add 16 lines to save specific config.sef for each slave site.

Perhaps does somebody know why such a problem is?

Thanks Tomas

The latest version of sh404SEF that I have tested is a version 1.5.9.
Would you please send me the sh404SEF 2.0 in an attachement of an email for review.
I will try to reproduce it with this version.
See contact us for the email

---

hi,
I am testing now with a 1.5.9.434 -

On the master : no problem

on the slave, when I want to go to sh404sef : Fatal error: Class 'shRouter' not found in /opt/MASTER/components/com_sh404sef/shCache.php on line 60

just fyi.
I see this is a fresh thread..
will try to resolve it.. but you never mean in meantime I get a reaction as I see Edwin is online :)

to be clear MASTER is not the real value, but for privacy reasons the real value is hidden.

_____

Check if you also have installed the plugins.

_____

I must better do my homework.. please excuses.. first hours of use of JMS;

Published plugin and propagated it to slave

Now sh404sef works, but "?site_id=:master_db:" is put after the url.

this will be a setting issue, which I will find myself.. I hope
thx Edwin.

_____

I have effectivelly received the sh404SEF and I confirm that the patches can not be installed with the version 2.0.
I will provide a new patch definition in the next release of JMS 1.2.35 with the patch definition 1.2.41
